The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Collins et al (US 2003/0026873) for reasons of record.

Applicant argues that Collins does not use the vacuum and the predetermined pattern of holes to pick up a predetermined pattern of candy. This has been considered but is not persuasive. The predetermined pattern is determined by openings 5 on member 20. The claims, as written, do not require the vacuum to pickup a predetermined pattern of candy. Applicant urged that Collins does not show an edible adhesive, as required in claim 2. This is disagreed with because the edible adhesive is shown in paragraph 33 of Collins.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Collins et al (US 2003/0026873) for reasons of record.

Applicant argues that Collins does not use the vacuum and the predetermined pattern of holes to pick up a predetermined pattern of candy. This has been considered but is not persuasive. The predetermined pattern is determined by openings 5 on member 20. The claims, as written, do not require the vacuum to pickup a predetermined pattern of candy. The candy remaining on the support surface is considered to be any pattern of candy at openings 3 or 4, which may be treated subsequently to opening 5. Applicant urged that Collins does not show an edible adhesive, as required in claim 2. This is disagreed with because the edible adhesive is shown in paragraph 33 of Collins.

Applicant argues that Collins does not use more than one pattern of colored beads. This has been considered but is not persuasive. If one of ordinary skill in the art wanted to create a complex pattern of colored beads on a candy surface, it would have been obvious to use more than one bead pattern. Applicant argues fruit flavored beads but to flavor the candy of

Collins would have been an obvious way to modify the flavor of the candy. It is appreciated that vibration and pressing the candy is not mentioned but to manipulate the candy to achieve a specific arrangement of candy would have been an obvious way to create an optimal pattern on the top of the chocolate.

No claim is allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.
